• RECOMMENDATIONS

The key success factor in the movie industry is the cost. Affordable movies that offer customers value can attract more customers

A good stock of popular movies which are in trend can be rented more, like most popular actors movies, shows will be rented more. So stores will need to have a good amount of stock.

The most popular genres among the population are 'Sports' 'foreign' 'family', the company has to focus on these genres.

Advertising and marketing also play an important role in-store business. So having good marketing strategies like discounts on the least popular movies so people can rent them often.

India and China are the countries where more customers are based. These countries also give high revenues so Rockbuster needs to increase their stores in the most common cities in respective countries. PG-13 is the most popular rating. Working with film production companies to make more movies of the same rating also impacts the business.
